

## Fundamentals of Pay Equity Analysis

Rhonda Farrington Managing Director and Principal

Susan Malanowski Managing Director and Principal

August 2024

# Wilson Group

Wilson Group is a boutique compensation consulting firm specializing in executive, sales and employee total compensation. We have been trusted advisors to over 400 organizations, nationally and globally, across a wide range of industries and business structures.

The firm is co-owned by Rhonda Farrington and Susan Malanowski, who work with a team of highly experienced professionals and partner organizations, to drive business performance through effective pay programs and strategies.

We have developed deep relationships with our partner organizations to provide even broader services to our clients including areas such as benefits and human resources operations.

Methodology and Approach

Pay Analysis and Remediation

Pay Equity Solutions

Session Summary

**Webinar Purpose and Objectives** 

- Providing a comprehensive examination of the relationship of pay across all jobs in the organization
- Answering fundamental questions before embarking on a pay equity analysis

Why you are conducting an analysis, what is your pay philosophy and what is your readiness to make pay adjustments

How you will ensure your pay equity analysis remains confidential until you are ready to share the results

What is involved in the data analysis including traditional (regression) and other types of analyses and who to involve in the process

How to address the challenge of maintaining pay equity on an ongoing basis

### **Pay Equity Definition**

- Fair pay for comparable jobs that is internally equitable, externally competitive and transparently communicated
- Establishing and maintaining pay equity in your organization requires an approach that reflects what is going on inside and outside an organization
  - > Pay equity should not be a one and done exercise
  - Going beyond complying with state or federal laws
  - > A philosophy that is both market competitive and internally fair
  - The right communication strategy

### **Reasons for the Analysis**

Pay transparency is needed or is an area for improvement
--

0

Compensation philosophy and/or organizational values

A

Acquisitions require analysis of new jobs being added to the organization

Employee survey results or complaints that have been received

Legal Compliance at the Federal, State, City and Industry level requires this analysis

### **Before Conducting a Pay Equity Analysis**

Define the goals or reasons for the analysis

- -Set an agenda and timeline for completing the analysis
- -Determine who should be involved in your pay equity project

Determine the level of company confidentiality that is needed when conducting any internal analysis of jobs -Understand what needs to be protected

- -Connect with internal or external legal counsel
- -Discuss how to manage the paper and online trail of data output

Prepare to Create 'Comparable Jobs'

#### Collect:

- Job description and organization data
- Compensation and benefits information by EE
- People data, demographics, employee data

**Defining Comparable Work** 

### **Comparable Work has similar:**

Skills: Knowledge and abilities required to perform the job

**Responsibilities:** Duties and tasks assigned to the job

**Effort:** Level of mental or physical exertion needed to perform the job

**Working Conditions:** Environmental factors surrounding the job

#### Where to start:

Develop categories and groups that make sense for your organization, and the type of work

#### - Comparable Job Groupings

### **Development of Comparable Job Groupings**

Three core *Career Categories* are first defined:

- Management (M): Includes positions where the incumbent primarily achieves department objectives through the coordinated achievements of two or more subordinate staff who report to the incumbent.
- Professional Individual Contributor (P): Includes positions which require a theoretical and conceptual knowledge of the specialization. Problems are typically solved through analysis and strategic thinking.
- Support Individual Contributor (S): Includes clerical administrative support, service-oriented, or operational positions. Issues are typically solved through knowledge of past practices and procedural guidelines, or knowledge gained through a certification or licensing program.

### **Development of Comparable Job Groupings**

<u>Sub-Categories</u> would then be defined to address the difference in job skills and responsibilities:

- Administration (A): Positions providing administrative support to an organization, e.g., Administrative Assistant
- Business (B): Positions providing skills or knowledge in the business field, e.g., Marketing Coordinator
- Technical/Operations (T): Positions providing skills or knowledge in the technology field, e.g., System Administrator

#### **Defining Career Categories and Sub-Categories**

#### Sample Language

Professional	Ducinaca
PIUESSIUIId	I DUSIIIESS

Non-technical jobs as found in Human Resources and Finance. Usually exempt-level salaried professionals. Some prior experience or on-the-job knowledge of a specific field. Main responsibilities are within the specific field of knowledge and ensuring the day-to-day tasks are completed.

#### **Professional Technical**

Technical jobs as found in Information Technology and Engineering. Usually exempt-level salaried professionals. Some prior experience or on-the-job knowledge of a specific field. Main responsibilities are within the specific field of knowledge and ensuring the day-to-day tasks are completed.

**Development of Comparable Job Groupings** 

<u>Career Levels</u> are then assigned using career level descriptors as a guide to making level decisions based on:

- a review of the job descriptions of all positions
- a discussion with Human Resources and others as needed

Remember - career level descriptors are developed based on the job factors:

- Skill
- Effort
- Responsibility
- Working Conditions

Career Level/Sub-Category	Levels
Management Business (MB)	1-6
Management Technical (MT)	1-6
Professional Business (PB)	1-5
Professional Technical (PT)	1-5
Support Administration (SA)	1-5
Support Technical (ST)	1-4

**Development of Comparable Job Groupings** 

Job Families		
Administrative	ADM	
Engineering	ENG	
Finance	FIN	
Facilities	FAC	
Human Resources	HR	
Information Technology	IT	
Marketing	МКТ	
Sales	SLS	

Job Families are an additional way to further organize comparable jobs for larger companies

\*An additional benefit: The development of a structured system (Job Architecture) that defines and categorizes all the positions within the company based on widely used practices

### **Defining the Data and Factors for Analysis**

#### Data Key SAMPLE

Location Key		
1 - Nashville, TN		
2 - Memphis TN		

- mempins, m
- 3 Knoxville, TN
- 4 Chattanooga, TN

<u>Gender Key</u>		
1 - Male		
2 - Female		
3 - Non-Binary		

#### **Ethnicity Key** 1 - Under 40 1 - Black 2 - Over 40 2 - Hispanic or Latino

- 3 White
- 4 All Other Ethnicity/Not Specified

### **Total Rewards**

Basic Pay + OT

Bonus

Other Bonuses

Car Allowance + Other Perquisites Benefits

#### **Other Factors and Defensible Systems**

Salary Ranges Market Data **Performance Ratings** Time in Position **Overall Tenure Relevant Experience** 

Age Key

**Types of Analysis** 

Traditional analysis methodologies for identifying potential disparities:

	A quantitative method that compares the average earnings of these
Pay Gap Analysis:	employee groups (gender, race, etc.) to determine if there are significant differences.
	Significant uniciences.

A statistical method that controls for factors that legitimately influence **Regression Analysis:** pay differences, such as job role, experience, performance, education, and location.

**<u>Note</u>**: An analysis to market or position within salary ranges is another method but not as in-depth.

Pay Gap Analysis and Comparable Pay

#### Pay Gap Analysis Methodology

Identify pay gaps based on the variance of average pay between the primary data point and all other data points, e.g., Male employees compared to Female employees, Male employees compared to non-Binary employees. Average Female Pay \$104,902/Average Male Pay \$106,385 = 99%

#### **Comparable Pay Methodology**

Calculate the percent of the average pay difference between the two data points for all incumbents in a Comparable Job Grouping

Use consistent variance definitions such as those shown below for each comparable job grouping, recommended adjustments to compensation should be agreed upon.

Variance of 5% or less:	For Comparable Job Grouping levels 1-2 in Management, Professional and Support
Variance of 10% or less:	For Comparable Job Grouping levels 3-6 in Management, Professional and Support

### **Analysis Impact on Comparable Job Groups**

- Do we have the jobs in the right career level?
- Are the career category descriptions reflective of the jobs in the organization?
- Are there any jobs in a comparable job grouping that do not fit?

*Exercise*: Using all jobs within a comparable job group, review and discuss the draft career level descriptors

Job Title	Career Category	Career Level
Project Engineer	Professional Technical	Level 2
Assistant Estimator	Professional Technical	Level 2
System Administrator	Professional Technical	Level 2
Field Engineer	Professional Technical	Level 2
Assistant Superintendent	Professional Technical	Level 2
Assistant Safety Manager	Professional Technical	Level 2
Preconstruction Coordinator	Professional Technical	Level 2

Pay Gap Analysis - Gender Sample

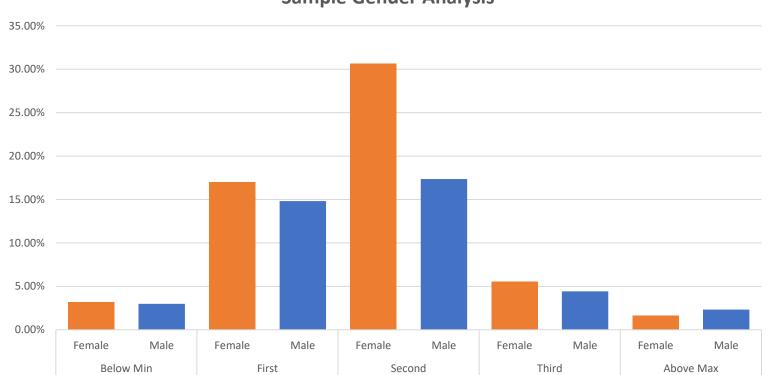

- In this Professional Business Level 2 group, female average pay is 99% of male average pay
- This variance is consistent in LA, female average pay is 97%
- In NYC, female average pay is 102%

### Salary Range Analysis Sample

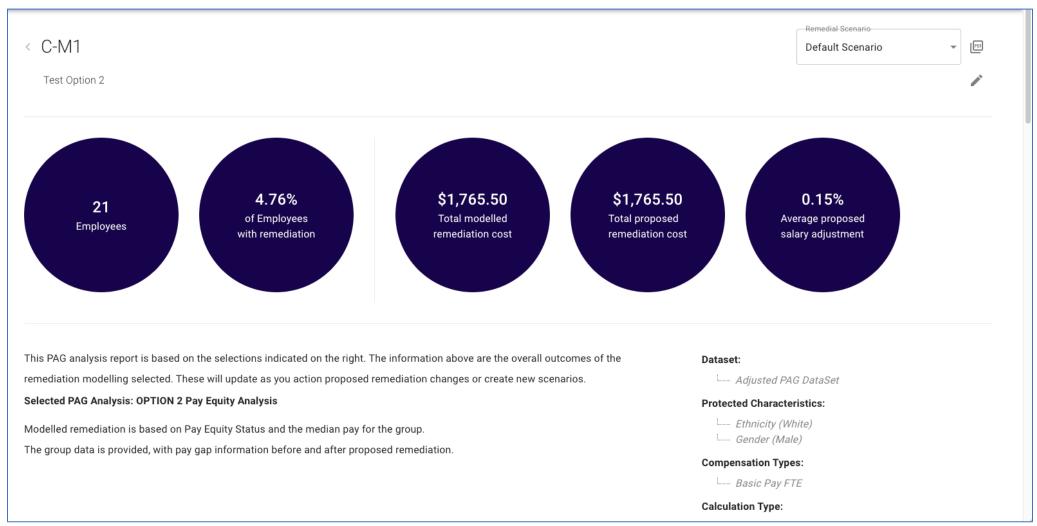

Across all employee groups, the analysis of gender position in range indicates that males and females are distributed consistently across ranges, with more females being paid at market or better.

Sample Gender Analysis

### **Remediation Sample**

### Pay Analysis and Remediation Remediation

- When there are employees (e.g., male or female) within a comparable pay grouping that are identified as outliers, after factoring for performance, relevant experience, tenure, etc., a new salary (or other compensation) is established.
- If salary increases are large for some employees, e.g., > 10%, or the organization cannot afford to increase all identified employees, the increases may take more than one year to implement.
- Increases are often effective at the same time as annual increases.
- A communication strategy with messaging is developed.

## Pay Equity Solutions

### **Pay Equity Solutions**

### **Features and Providers**

Group	Model Internal
Comparable Jobs	Equity
Benchmark External Competitiveness	Communicate Transparently
Update	Attorney/Client
Continuously	Privilege

- Excel/Power BI/Tableau
- Salary.com
- PayScale
- Trusiac
- HCM providers, such as Workday and Oracle

## Summary

### **Session Summary**

### Pay Equity Analysis Steps

#### Examine the relationship of pay across the comparable job groupings

- 1. Develop pay equity analysis methodology
- 2. Determine comparable jobs
- 3. Analyze total compensation
- 4. Identify outliers and finalize analysis
- 5. Determine pay actions, cost and process for remediation
- 6. Confirm ongoing process and tools to maintain pay equity
